

In partnership with

Reference Letter for Ginjala Hasini

To whom it may concern,

Hasini was on a work attachment with Hatch as part of the METEOR Programme under Crater. In the month that she was with us, she supported the design and improvement of our company website, first with the creation of moodboards around our organisation values, and subsequently through the design of wireframes to illustrate her prototypes.

Here at Hatch, we value the trust established with our team to deliver on the work that have been assigned to them. In this regard, Hasini has been responsible and consistent in always putting in her best to deliver on her assignments. We find her attitude towards work commendable and appreciated her diligence in exploring ways to learn and use new tools in the process.

Through my conversations with Hasini, I have found her to be a driven individual with a keen interest in learning and honing her technical skills. I am proud of what she has achieved in her time with us, and wish her the very best in what she pursues.

Regards,

Victor Zhu
